EXPERIENCE

Software Developer, ETIPI — Jun 2025 – Present

- Work as a Full Stack Developer building microservices in **Java with Spring Boot** and micro frontends with **React.js and Next.js** to integrate systems on the **Gov.PI Cidadão** platform, which centralizes more than **600 digital public services**.
- Implemented asynchronous architectures with **RabbitMQ**, queues and events for communication between microservices, reducing the response time of critical operations by up to **80%**.
- Developed the backend of the new **Hemopi** (state blood center) system, contributing to the digitalization of appointment scheduling, system integration and legacy data migration.
- Implemented centralized authentication with **Keycloak**, Spring Security and role-based access control (RBAC).
- Built micro frontends with **React.js** and **Next.js**, integrated with REST APIs, focusing on performance, responsiveness and user experience.
- Work in an agile environment, taking part in Scrum ceremonies, technical refinements, backlog prioritization and continuous delivery in collaboration with the team.
- Implemented **CI/CD** pipelines and deployments to containerized environments using **Docker**, **Kubernetes** and **OpenShift**.
- Apply **Artificial Intelligence to software development**, structuring workflows with Spec-Driven Development (SDD), specialized agents and automations throughout the delivery cycle.
- Integrate **MCPs and context tools** into AI agents to support implementation, code review and adherence to the company's technical, architectural and design standards.

Full Stack Developer, Hiperdigi — Jun 2024 – May 2025

- Maintained and evolved a **legacy Java 8 system**, analyzing existing code, fixing issues and implementing new business rules with **Spring Boot**, JPA/Hibernate and REST APIs.
- Developed new features end to end, from data modeling and persistence on the backend to integration with the system's user interfaces, including writing and tuning **SQL** queries.
- Built a management system for a laundry business using **Vue.js**, **Bootstrap** and **Spring Boot**, covering inventory control, item registration and item tracking.
- Implemented the label generation and printing workflow for item identification and tracking, integrating labeling with the records and movements registered in the system.
- Fixed and improved existing features, investigating behavior in the legacy code and adapting implementations without disrupting the workflows already in use.

Flutter Mobile Developer, FAPEPI — Apr 2023 – Mar 2024

- Developed a cross-platform mobile app in **Flutter** for the Youth Coordination Office of the State of Piauí, contributing to the implementation and evolution of the app's features.
- Integrated the app with **REST APIs**, consuming, handling and displaying backend data in the mobile interfaces.
- Developed and maintained reusable screens and components in **Flutter/Dart**, working with navigation, forms, validation and app data management.
- Investigated and fixed issues in existing features, adjusting the interface and app flows to improve stability and usability.

EDUCATION

Associate Degree in Systems Analysis & Development, Federal Institute of Piauí Feb 2022 – Feb 2025
Postgraduate Specialization in Cloud Computing, Uninter Dec 2025 – Jul 2026

SKILLS

Backend: Java 8+, Spring Boot, Spring MVC, Spring Security, JPA/Hibernate, Microservices, RESTful APIs, JUnit, RabbitMQ, Kafka, Keycloak
Quality & Best Practices: OOP, SOLID, Design Patterns, Unit Testing, Integration Testing, Code Review, Git
Databases: PostgreSQL, MySQL, MongoDB, Redis, Data Modeling, SQL Queries
DevOps & Cloud: Docker, Kubernetes, OpenShift, CI/CD, AWS, Maven, Jenkins
Frontend: React, Next.js, Vue.js, Angular, JavaScript, TypeScript, HTML, CSS
Methodologies: Scrum, Kanban, Agile
Languages: Portuguese (Native), English (Advanced, C1)
